ABSTRACT

The third edition of this work, originally published in 1971 and revised in 1972, presents a method of classifying children's multi-media materials which is designed for compatibility with the Library of Congress system for adult materials. Adapted by main classes and two-letter sub-classes augmented by one or two additional numbers when main classes and two-letter sub-classes augmented by one or two additional numbers when further subdivision is required. The classification system is supplemented by a comprehensive list of alphabetically arranged index terms. The terms are also arranged by classification so as to illustrate subject groupings of each sub-class. A chapter on suggestions and recommendations for spine labels and special collections is included. This edition reflects a revision in classification which includes the addition of 45 new letter-number subclasses. The index has been expanded and some terms dropped making a new total of 3,276 index terms. A chapter of cataloging notes, arranged by subject and reflecting five years of cataloging decisions, is new and should prove useful to the cataloger. Also included is material on the classification of sound recordings previously published separately. (Author/AP)

Library of Congress Classification Adapted for Children's Library Materials. Third edition.

200 WORD ABSTRACT

This third edition of a work originally published in 1971 and revised in 1972 (ED 076-216) presents a method of classifying children's multi-media materials which is designed for compatibility with the Library of Congress system for adult materials.

The adapted LC classification, developed by the Inglewood Public Library and currently in use there, employs one-letter main classes and two-letter subclasses augmented by one or two additional numbers when further subdivision is required.

The classification system is supplemented by a comprehensive list of index terms arranged alphabetically. Index terms are also arranged by classification so as to illustrate subject groupings of each subclass. There is also a chapter on suggestions and recommendations for spine labels and special collections.

This new edition reflects a revision in classification which includes the addition of 45 new letter-number subclasses. The index has been expanded and some terms dropped, making a new total of 3,276 index terms. A chapter of cataloging notes, arranged by subject and reflecting five years of cataloging decisions, is new and should prove useful to the cataloger. Also incorporated in this new edition is material on the classification of sound recordings, previously published separately (ED 076-217).

PREFACE TO THE THIRD EDITION

This new third edition is applicable to a multi-media collection as evidenced in the new title, Library of Congress Classification Adapted for Children's Library Materials. In addition to changes, additions, and deletions affecting the second edition, titled Library of Congress Classification Adapted for Children's Books (1972), materials from Library of Congress Classification Adapted for Children's Sound Recordings (1973) have been revised and included.

Changes in classification from the second edition include (1) deleting 4 two-letter subclasses, (2) adding 8 new two-letter subclasses, and (3) providing 45 new letter-number subclasses by expanding existing subclasses or adding to new subclasses.

The index has been expanded and numerous changes made in the index terms arranged by class. New index terms added totaled 439 while 243 were cancelled, making a new total of 3,276 index terms. This includes 343 classification changes reflecting the addition of new subclasses as well as reassigned classifications.

The chapter of cataloging notes arranged by subject is new and should prove useful to the cataloger. These notes were developed since publication of the first edition in 1971 and reflect five years of cataloging decisions. Another new chapter concerns the cataloging of children's sound recordings. Some revision was made in the chapter concerning spine labels and special collections.

The following is a detailed account of changes, additions, and deletions made in this new third edition.

INDEX TERMS

Many index terms were reassigned (such as 4-H Clubs from S to HS and Fortune telling from XV to BG), non-current terms dropped (such as International Geophysical Year and Lunar probes), and new terms added (such as Bangladesh, Watergate Affair, and Hang gliding.

CLASSIFICATION

Title and date changes.

B	PHILOSOPHY AND RELIGION changed to PHILOSOPHY, PSYCHOLOGY, AND RELIGION.
D4	MODERN HISTORY (1500-1900) to MODERN HISTORY (1500-1800).
D5	MODERN HISTORY (1900-1913) to MODERN HISTORY (1800-1913).

DT3	EGYPT to EGYPT AND SUDAN.
DT52	CONGO to CONGO AND ZAIRE.
DT6	SOUTH AFRICA — GENERAL to SOUTHERN AFRICA — GENERAL.
EQ	UNITED STATES (1865-1900) to UNITED STATES (1866-1913).
FF	NEGROES AND OTHER IMMIGRANT GROUPS IN LATIN AMERICA to IMMIGRANTS IN LATIN AMERICA.
PZ	BOOKS IN FOREIGN LANGUAGES to LANGUAGE INSTRUCTION. (Separate collections classified in the same manner as books in English are recommended for books in foreign languages — SPANISH QA for a book in Spanish on mathematics, for example.)
QS	REPTILES to REPTILES AND AMPHIBIANS.
QU	ANATOMY to HUMAN BODY.
QX	BACTERIOLOGY to MICROBIOLOGY.

Subclasses deleted.

EJ	MISCELLANEOUS IMMIGRANT GROUPS. (Materials transferred to EH.)
ER	UNITED STATES (1900-1913). (Materials transferred to EQ.)
QN	VERTEBRATES — GENERAL. (Materials transferred to QL.)
RD	SPECIALIZED MEDICAL FIELDS. (Materials transferred to RC.)

New subclasses.

DX	GYPSIES. (Materials formerly incorporated in GN.)
GU	ETIQUETTE. (Materials formerly incorporated in GT.)

MC	SONGS. (Materials formerly incorporated in ML.)
ME	FOLK MUSIC. (Materials formerly incorporated in ML.)

MG POPULAR MUSIC.
(Materials formerly incorporated in ML.)

MJ FILM AND THEATER MUSIC.
(Materials formerly incorporated in ML.)

UF ARMS AND ARMAMENT
(Materials formerly incorporated in UA and UG.)

New letter-number subclasses

(EH POPULATION ELEMENTS IN THE UNITED STATES - GENERAL, formerly titled NEGROES IN THE UNITED STATES. Materials in the following letter-number subclasses were formerly incorporated in EH or the deleted subclass EJ MISCELLANEOUS IMMIGRANT GROUPS.)

- EH2 ASIAN AMERICANS.
- EH3 BLACK AMERICANS.
- EH4 EUROPEAN AMERICANS.
- EH5 LATIN AMERICANS.

(LB CONCEPT FORMATION - GENERAL. New title for this subclass. VOCATIONAL GUIDANCE, formerly LB, was redesignated LC. Materials below are included for the first time.)

- LB2 SPACE PERCEPTION.
- LB3 VISUAL PERCEPTION.
- LB4 AUDITORY PERCEPTION.
- LB5 TACTILE PERCEPTION.
- LB6 OLFACTORY PERCEPTION.
- LB7 TASTE PERCEPTION.

(NP HANDICRAFTS - GENERAL. Materials below formerly incorporated in NP.)

- NP2 PAPER CRAFTS.
- NP3 WOOD AND METAL CRAFTS.
- NP8 HANDICRAFTS, SPECIALIZED.

(PN LITERATURE - GENERAL. Materials below formerly incorporated in PN.)

- PN2 WRITING (AUTHORSHIP).
- PN3 PUBLIC SPEAKING.

(PQ DRAMA - GENERAL. Materials below formerly incorporated in PQ.)

- PQ2 PLAYS.
- PQ3 ACTING.
- PQ4 STAGECRAFT.
- PQ5 TELEVISION AND MOTION PICTURES.
- PQ6 PUPPETS AND PUPPET PLAYS.
- PQ7 FINGER PLAYS.

(QA MATHEMATICS – GENERAL. Materials below formerly incorporated in QA.)

QA2 COUNTING.
QA3 GEOMETRY.
QA4 ADVANCED MATHEMATICS.
QA7 COMPUTER SCIENCE.

(QM INVERTEBRATES – GENERAL. Materials below formerly incorporated in QM.)

QM2 MARINE INVERTEBRATES.

(QT MAMMALS – GENERAL. Materials below formerly incorporated in QT.)

QT2 MONOTREMES AND MARSUPIALS.
QT3 INSECT-EATING AND FLYING ANIMALS.
QT4 PRIMATES.
QT5 GNAWING ANIMALS.
QT6 CETACEANS.
QT7 CARNIVORES.
QT8 PROTO– AND PAEN–UNGULATES.
QT9 UNGULATES.

(SB PLANT CULTURE – GENERAL. Materials below formerly incorporated in SB.)

SB2 HOME GARDENING.

(SF ANIMAL CULTURE – GENERAL. Materials below formerly incorporated in SF.)

SF2 PETS.
SF3 VETERINARY MEDICINE.

(SH FISH CULTURE – GENERAL. Materials below formerly incorporated in SH.)

SH2 FISH AS PETS.

(XQ WHEEL SPORTS – GENERAL. Formerly titled MOTOR SPORTS AND CYCLING. Materials below formerly incorporated in XQ.)

XQ5 MOTORCYCLING.
XS6 CYCLING.

(XS INDOOR SPORTS AND GAMES – GENERAL. Materials below formerly incorporated in XS.)

XS2 TOYS.
XS3 ENTERTAINING.
XS4 TABLE GAMES.
XS5 PUZZLES.
XS6 HUMOR.

Other subclass changes.

DA	GREAT BRITAIN formerly used for EUROPE — GENERAL. Materials formerly covered in DA transferred to D.
DB	AUSTRIA formerly used for GREAT BRITAIN. Materials formerly incorporated in DD.
M	INSTRUMENTAL AND VOCAL MUSIC formerly titled MUSIC — GENERAL. Materials formerly designated ML.
RC	MEDICAL FIELDS AND PHYSICAL DISORDERS formerly titled PHYSICAL DISORDERS. Materials formerly incorporated in RC and RD.
XM	FISHING, HUNTING, AND SHOOTING SPORTS formerly titled HUNTING AND SHOOTING SPORTS. Materials on fishing as a sport, formerly in SH, now incorporated in XM.

Library of Congress Classification Adapted for Children's Library Materials. Third edition.

200 WORD ABSTRACT

This third edition of a work originally published in 1971 and revised in 1972 (ED 076-216) presents a method of classifying children's multi-media materials which is designed for compatibility with the Library of Congress system for adult materials.

The adapted LC classification, developed by the Inglewood Public Library and currently in use there, employs one-letter main classes and two-letter subclasses augmented by one or two additional numbers when further subdivision is required.

The classification system is supplemented by a comprehensive list of index terms arranged alphabetically. Index terms are also arranged by classification so as to illustrate subject groupings of each subclass. There is also a chapter on suggestions and recommendations for spine labels and special collections.

This new edition reflects a revision in classification which includes the addition of 45 new letter-number subclasses. The index has been expanded and some terms dropped, making a new total of 3,276 index terms. A chapter of cataloging notes, arranged by subject and reflecting five years of cataloging decisions, is new and should prove useful to the cataloger. Also incorporated in this new edition is material on the classification of sound recordings, previously published separately (ED 076-217).

INTRODUCTION

The change-over from the Dewey Decimal classification to the Library of Congress (LC) classification system proved so successful for adult subject materials in Inglewood — in branch libraries as well as the main library — that it seemed only logical to devise a similar system for children's materials.

In developing our adaptation of LC for children's library materials, we thought in these terms: (1) a classification system adapted from the standard LC classification would prepare children to use adult materials by means of a gradual transition; (2) we could plan a system that would more closely reflect the subject matter of children's library materials; (3) the LC adaptation would be easier for children to understand and use than the Dewey Decimal classification; (4) the classification system could be easily expanded as required; and (5) a mandatory re-evaluation of children's subject materials would result. This last concept was especially challenging — we analyzed children's materials in a different context and relationship. Subjects, in some cases, were grouped with subjects other than those with which they were related in the Dewey Decimal classification.

We considered these requirements: (1) retaining as close a relationship as practicably possible to the adult LC classification system; (2) developing a system which uses classification symbols composed of one or two letters followed in some cases by one or two numbers; (3) using the first three letters of the author's last name (main entry) in place of an author number; and (4) devising a clear-cut classification, reducing the possibility of "choice" between various classes and subclasses.

The classification system is supplemented by a comprehensive alphabetical list of index terms. Index terms are also arranged by class to illustrate subject groupings in each subclass. There is a new chapter on children's sound recordings, a new chapter containing cataloging notes, and a chapter on suggestions and recommendations for spine labels and special collections.

The classification system is revised periodically as (1) new materials indicating new subject areas or relationships are reviewed, (2) comments and recommendations are received from those using children's library materials classified according to this LC adaptation, and (3) comments are received from those who review this publication. Comments and recommendations are solicited.

CHANGES AND MODIFICATIONS TO THE ADULT LIBRARY OF CONGRESS CLASSIFICATION[1]

All the major LC subclasses have been used if at all practicable; that is, if sufficient children's subject materials are available — or the possibility exists that new materials will be published — to justify the retention of a subclass. Examples of some adult LC subclasses not applicable to children's books are CD (Archives) and RX (Homeopathy).

Some subclasses have been incorporated into other classes because of insufficient material — e.g., the adult L.C. subclass BJ (Ethics) was placed with our class B PHILOSOPHY. Some important subclasses fit better in another class — e.g., the adult L.C. subclass BH (Esthetics) was placed in our class N FINE ARTS. In some cases, several subclasses were assembled under one subclass, e.g., JF POLITICS AND GOVERNMENT (EXCEPT UNITED STATES) was devised to include adult LC subdivisions such as JN (Europe) and JQ (Asia).

We developed new two-letter subclasses to subdivide the three adult LC classes which employ only one letter followed by numbers: E and F (History: America) and Z (Bibliography and Library Science).

Letter-number subclasses are used when additional detail is required. Examples are EZ WESTERN UNITED STATES — LOCAL HISTORY AND DESCRIPTION — GENERAL, EZ5 PACIFIC STATES — GENERAL, EZ55 CALIFORNIA, or DS ASIA — GENERAL, DS6 FAR EAST — GENERAL, and DS62 CHINA.

Although not shown in this system of classification, even further expansion is possible for cities, counties, regions, or other geographical subdivisions. For example, a large amount of material on cities in California could be further subdivided by use of two letter-three number subclasses such as EZ552 LOS ANGELES, EZ553 SAN DIEGO, EZ554 SAN FRANCISCO, etc.; a large amount of material on China could be further subdivided DS622 NORTH CHINA, DS623 SOUTH CHINA, etc.

A new class X SPORTS AND RECREATION was developed because of the volume of children's materials in this area.

Every effort was made to analyze subjects in terms of assembling them in one place rather than having variations appear in different subclasses. Pollution (air, water, noise, solid waste, etc.) is placed in the new subclass ST POLLUTION. Another example is the new subclass HY ADDICTION, which assembles a variety of subjects widely dispersed in adult LC.

---

[1] Adult LC subclasses are shown in lower case and in parentheses — e.g., (CD Archives). The adapted LC is shown in capitals — e.g., B PHILOSOPHY.

NUMBER OF CLASSES AND SUBCLASSES

A total of 407 subclasses have been developed[1]. This includes 221 one-letter or two-letter subclasses (54 percent of the total), 100 one-number subclasses, and 86 two-number subclasses. (Of the 86 two-number subclasses, 68 are used for states and Canadian provinces (class E) and 18 for Asia and Africa (class D)).

There are major variations in the number of children's books available on the subjects included in each subclass. For example, there are more children's books on the subject of aeronautics (subclass TM) than on nursing (subclass RT) or genealogy (subclass CS). Most of the subclasses are taken from the standard LC classification. This accounts for much of the variation in subject coverage, although as previously noted, some of the standard LC subclasses with little applicable material were not used or were combined into other subclasses.

Indicated below are the 22 classes and the number of subclasses in each class.

	Classes	Letter subclasses	Letter-number subclasses	Total subclasses
A	GENERAL WORKS	4		4
B	PHILOSOPHY, PSYCHOLOGY, & RELIGION	9	2	11
C	AUXILIARY SCIENCES OF HISTORY	7	6	13

Penmanship. Typing. Cryptography. Inscriptions.

ZB PRINTING AND PUBLISHING
Printing industry. Bookbinding. History of books.
Magazine and newspaper publishing.

ZC LIBRARIES
Book collecting

ZD BIBLIOGRAPHY
Literary prizes.

4

INDEX TERMS ARRANGED BY CLASS

Index terms are arranged within each class in order to illustrate the variety and scope of the subjects encompassed in each class and subclass. Examples of the variety of index terms in a subclass include *Cemeteries* and *Fashion* in GT MANNERS AND CUSTOMS: *Supermarkets* and *Whaling industry* in TS MANUFACTURES AND TRADES. This arrangement further illustrates related subjects or topics that have been grouped in the same subclass (e.g., *Calendar* and *Sundials* in CE TIME MEASUREMENT; *Capitalism* and *Utopias* in JC FORMS OF THE STATE).

NOTES

Reference to cataloging notes in Chapter 6 is made by means of a note number or numbers following either a subclass title or an individual index term.

FILING ORDER

Subject materials are arranged in this order:

(1) One letter — D
(2) One letter and one number — D2
(3) Two letters — DS
(4) Two letters and one number — DS5
(5) Two letters and two numbers — DS55

A decimal arrangement is used for classifications subdivided by numbers. For example, DS55 precedes DS6. This is the order in which they appear in this chapter.

ALPHABETICAL INDEX OF TERMS USED IN THE CLASSIFICATION SYSTEM

The terms in this index are intended to cover, to the depth considered necessary, the subject content of children's library materials.

Every attempt has been made to be as specific as possible. Inverted terms and qualifiers in parentheses are used when required for clarity (e.g., Hockey, Field in contrast to Hockey, Ice, and Customs (duties, tolls) in contrast to Customs (social life)).

Some esoteric terms, such as Lagomorphs or Finnish literature, are included to illustrate the full scope of the classes.

THE INDEX AS REFERRAL GUIDE

This alphabetical list of index terms is designed as an aide to enable the classifier to assign the correct classification symbol. It is not intended to be used separately but only in conjunction with Chapter 4, "Index Terms Arranged by Classification." By noting the classification symbol following the term in the alphabetical list, the cataloger can refer to that same classification symbol in Chapter 4. By comparing the term in question with other terms in the same class, the cataloger can insure the appropriate classification symbol will be assigned.

NOTES

Chapter 6 contains serially numbered cataloging notes arranged alphabetically by descriptive headings. Reference to these notes by number in parentheses is made in Chapter 4, "Index Terms Arranged by Classification," and not in this alphabetical index of terms.

Because of the general nature of some subjects, their assignment to a class or classes would be misleading. In those instances, therefore, referrals in this alphabetical index are made directly to notes. Examples are Buried treasure, Employment, Government agencies, and Historical periods.

DIVISIONS OF MAJOR SUBJECTS

In compiling this index of terms it was necessary to assess the amount of detail required in various subject areas and make determinations:

1) Major geographical areas, including countries, states, and provinces, are listed, but cities and most natural features are omitted. However, some important natural features, such as mountain chains or rivers that cover a broad geographical area, are included.

2) Individual names of many animals are included in order to eliminate the need for reference to other sources of animal classification.

3) Names of persons, real or legendary, are not individually listed.

4) The major invertebrates and reptiles are included, but fish and birds are not individually listed.

5) Flowers, trees, and plants, in general, are not individually listed.

6) Individual musical instruments are not listed.

7) Chemical elements, in general, are not individually listed.

8) Historical events and battles, in general, are not listed.

GENERAL VS. SPECIFIC TERMS

General terms are intended to cover broad subjects (Mammals, Agriculture, Economics, etc.). In determining a classification, it is important to be as specific as possible. A general term may not be the one to consider if the content of the material is such that it could be classified under a subdivision of a general class. A book on the general subject of mammals, for example, would be classified QT MAMMALS – GENERAL, but a book on monkeys and apes would be classified QT4 PRIMATES.

CATALOGING NOTES

Cataloging notes are designed to supply miscellaneous information not readily discernible from either the classification system or index terms (whether arranged by class or listed alphabetically). They also serve to amplify or clarify subject areas that might be ambiguous.

Notes are arranged alphabetically by descriptive heading (ecology, international organizations, speeches, etc.) and referred to by number. Reference is made to Chapter 4, "Index Terms Arranged by Classification." In this chapter the numbers appear after the class or subclass title and/or after the index term or terms assembled under a class or subclass.

Because of the general nature of some subjects, their assignment to a class or classes would be meaningless. In those instances, therefore, referrals in the alphabetical index (Chapter 5) are made directly to notes. Examples are Buried treasure, Employment, Government agencies, and Historical periods.

1 AFRICAN AMERICANS

EH3 BLACK AMERICANS is reserved for material on Blacks in the U.S. Information on non-black Africans (Egyptians, Afrikaaners, etc.) in the U.S. is classed EH POPULATION ELEMENTS IN THE UNITED STATES — GENERAL.

2 ANCIENT CIVILIZATIONS

Books on ancient civilizations in a particular country are classed under that country rather than under the broader heading D2 ANCIENT HISTORY. For example, a book on ancient Egypt is classed DT3 EGYPT AND SUDAN.

3 ARCHAEOLOGY

General material on archaeology, encompassing all aspects of the subject, is classed under CC ARCHAEOLOGY. Material concerned with the anthropological aspects of archaeology, or with prehistoric archaeology, is classed under GN ANTHROPOLOGY. The archaeology of a particular country is considered a part of the history of that country and is therefore given the classification of the country involved; i.e., a book on the archaeology of the city of Pompeii is classed DG ITALY.

4 ARMED FORCES

The classification U MILITARY is reserved for general materials on the topics listed, or for materials which cover more than one of the armed forces. Any of the topics listed, when treated from the point of view of any one of the armed forces, should be classed accordingly. For example, a book on psychological warfare in general is classed U MILITARY SCIENCE; a book on the U.S. Navy's use of psychological warfare is classed VA NAVIES.

5 ASIAN AMERICANS

The term ASIAN AMERICANS EH2 applies to those living in the United States whose ancestors came from any part of the Asian continent, including the Middle East, India, etc.

6 ASSOCIATIONS

Associations and clubs of a general nature are classed HS ASSOCIATIONS. Those dealing with a specific field or subject are classed accordingly; e.g., Alcoholics Anonymous is classed HY ADDICTION.

7 BIBLIOGRAPHIES

Bibliographies concerned with material on a particular subject are classified under that subject; general bibliographies are classed ZD BIBLIOGRAPHY.

8 BIRTH CONTROL

Material treating the social aspects of birth control, and information on the subject included in a general book on sex education, is classed HQ FAMILY. Material on the medical aspects of birth control and contraception is classed RC MEDICAL FIELDS AND PHYSICAL DISORDERS.

9 BURIED TREASURE

The search for buried treasure is classed CC ARCHAEOLOGY when approached from a scientific standpoint, and G GEOGRAPHY, when included in an account of adventure or seafaring life.

10 CARTOON BOOKS

Books of cartoons in comic strip form are classed PV CARTOON BOOKS. Books using cartoon or comic book characters and relating a story in picture book format are cataloged as fiction.

11 CHILDBIRTH

Books treating the subject of childbirth in a familial setting, or including it in a general book of sex education, are classed HQ FAMILY. Materials dealing with the technical medical aspects of childbirth are classed RC MEDICAL FIELDS AND PHYSICAL DISORDERS.

12 CITY AND REGIONAL PLANNING

General material on city and regional planning is classed HT COMMUNITIES; however, when the subject is dealt with on a strictly architectural basis, it is classed NA ARCHITECTURE.

13 CIVIL ENGINEERING

Individual harbors, ports, dams,canals, etc., are classed under their geographical area. Thus the Panama Canal is classed FK CENTRAL AMERICA, but a general book on canals is TA CIVIL ENGINEERING.

14 CLASSICAL LITERATURE

Classical literature, such as that of Homer and Ovid, is classed PA CLASSICAL LANGUAGES AND LITERATURE, even though a large part of it may be based on mythology and folklore.

15 COLLECTING

XU COLLECTING (HOBBIES) does not include the collecting of natural history specimens, such as insects and plants, which are classed under the appropriate biological heading QH through QT. It also does not include the collecting of books ZC LIBRARIES, nor antique articles, which are classed with the subject or field under which they belong.

16 COMPARATIVE ANATOMY

Comparative anatomy, in the sense of comparing animal anatomy with human, is classed QH BIOLOGY. When a publication deals with the comparative anatomy of animals alone, it is classed QL ZOOLOGY. Any publication presenting the comparative anatomy of a group of animals which falls under any one of the groups represented by classifications QM through QT9 is classed under that specific animal group. For example, a book comparing the shape of feet among mammals is classed QT MAMMALS — GENERAL.

17 CONSTITUTIONS

Constitutional law, history, and administration of a comparative nature are classed JF POLITICS AND GOVERNMENT. Works on the constitution of an individual country other than the United States are also classed JF, except when combined with the history and social conditions of that country. When the latter is the case, the publication is given the classification of the country in question.

18 ECOLOGY

Books on ecology in general are classified under SP CONSERVATION OF NATURAL RESOURCES. If a book refers primarily to ecology in the original sense of the term, as in eco-systems, it is classed QH BIOLOGY. Books dealing with ecology from the standpoint of pollution are ST POLLUTION.

19 EMPLOYMENT

General works on the philosophy and economic theory of employment and unemployment are classed HB ECONOMICS. The more practical aspects of employment, such as business and money making ideas, are classed HF BUSINESS AND FINANCE.

20 FASTS AND FEASTS

Books dealing with fasts and feasts that do not come under specific holiday celebrations are classed GT MANNERS AND CUSTOMS. Material on the fasts and feasts related to particular holidays is classed GS HOLIDAYS AND FESTIVALS – GENERAL.

21 FOLKSONGS AND FOLK MUSIC

Modern original music, when performed in the "folk style," is classed ME FOLK MUSIC, even though it may border on the territory of popular music (MG). For example, the songs of Joan Baez are classed ME FOLK MUSIC.

22 FOOD

Food as it affects one's health and diet is classed RA PERSONAL HEALTH AND HYGIENE. The preparation of food is TX HOME ECONOMICS.

23 FOREIGN LANGUAGE DICTIONARIES

"SPANISH" will be used to illustrate the handling of foreign language dictionaries. Use SPANISH PE for Spanish-English dictionaries where the introduction, title page, etc., are geared towards the Spanish speaking person. Use PC for English-Spanish dictionaries where the book is geared towards the English speaking person. Use SPANISH PC only when the dictionary is entirely in Spanish.

24 GOVERNMENT AGENCIES

Government agencies are classed under the specific subject or field they represent. For example, the U.S. Dept. of Transportation is classed HE TRANSPORTATION AND COMMUNICATION.

25 HANDICRAFTS

Books on crafts using one particular type of material (other than paper, wood, or metal) are classed NP8 HANDICRAFTS, SPECIALIZED. Also classed here are books dealing with one particular craft, or one approach to a craft, even if more than one type of material is involved. For example, a book on making holiday decorations employing all types of materials is classed NP8.

26 HISTORICAL PERIODS

Historical material which does not fall into one of the time periods specified, but rather covers a span which includes several classifications, is classed under the time period in which the span begins; i.e., a book on the 20th Century is classed D5 MODERN HISTORY (1800-1913); a book on United States history is classed EG UNITED STATES.

27 HOLIDAY COLLECTIONS

Collections of holiday fiction, carols, music, songs, poetry, and plays are classed GS2 HOLIDAY COLLECTIONS, as are individual carols, songs, poems, and plays with a holiday theme. Individual works of fiction with a holiday theme are cataloged as fiction and included in the fiction collection.

28 INTERNATIONAL ORGANIZATIONS

JX INTERNATIONAL ORGANIZATIONS AND LAW includes those organizations, based in a single country, which deal with international affairs and relations.

29 LANGUAGE

Many of the headings used under PE ENGLISH LANGUAGE serve as examples for the other language classifications as well. For example, an alphabet book in Swahili is classed SWAHILI PH; a speller in Spanish is classed SPANISH PC.

30 LANGUAGE INSTRUCTION

Books on English as a second language are classed PZ LANGUAGE INSTRUCTION; likewise, books directed towards the English-speaking person on the study of a foreign language are classed PZ with the appropriate language identification. For example, a book on how to learn German, directed towards the non-German, is classed GERMAN PZ. A book on German language instruction for the native German, however, is classed GERMAN PF GERMANIC LANGUAGES AND LITERATURE, just as English language instruction for the native English speaking person is classed PE ENGLISH LANGUAGE.

Alternate method: Class all books on language instruction under the appropriate classification PA through PM (Language and literature), thereby foregoing the classification PZ LANGUAGE INSTRUCTION. By this method, a book on English as a second language would be included under the classification PE ENGLISH LANGUAGE with the appropriate foreign language designator. For example, a book on how to learn English directed toward the German speaking would be classed GERMAN PE. A book on German language instruction directed towards the English speaking would be classed PF GERMANIC LANGUAGES AND LITERATURE. German language instruction for the native German would remain as above, GERMAN PF.

31 LATIN AMERICAN FOLK & FAIRY TALES

PR7 LATIN AMERICAN FOLK AND FAIRY TALES is the classification used for all folk and fairy tales from south of the U.S. border, regardless of whether the area is technically in North America. These include the West Indies, Mexico, etc.

32 LIFE IN FOREIGN LANDS

The classification H SOCIAL SCIENCES is used for social studies books which cover a combination or group of countries which cannot be classed under any specific geographical region.

33 LIFE IN THE FUTURE

Material on life in the future is classed T TECHNOLOGY AND ENGINEERING when it is treated from a technological standpoint; HM SOCIOLOGY, when presented from a sociological point of view; and BL RELIGION, when a work deals with the subject in the sense of an afterlife.

34 LIFE ON OTHER PLANETS

Material about life on other planets within our solar system is classed QB2 SOLAR SYSTEM. General works on the subject are classed QB ASTRONOMY.

35 LYRICS

Lyrics unaccompanied by their music are classed by type of music (MC through MJ) whenever possible; otherwise, they are classed ML LITERATURE OF MUSIC.

36 MAPS AND ATLASES

All books consisting solely of maps are classed GA CARTOGRAPHY, regardless of their geographic representation.

However, when historical, social, geographical, or other information is included in a book made up primarily of maps, it is then classed appropriately by geographical location.

37 MEDICAL RESEARCH

General medical research is classed R MEDICINE. Specialized research is classed under the appropriate medical field.

38 MILITARY HISTORY

General works on military history are classed under U MILITARY SCIENCE; however, when a book deals with the military history of a certain time period, it is classed accordingly. For example, military history of World War II is included under D8 WORLD WAR II, 1939-1945.

39 MODELS AND MODEL MAKING

Books on models and model making are classed XT MODELS AND MODEL MAKING, even though the subject may be handled as a craft.

40 MOTOR VEHICLES

Material dealing with motor vehicles in general, or with the mechanics of motor vehicles, is classed TL MOTOR VEHICLES. When treated as a sport, motor vehicles are classed XQ WHEEL SPORTS. Motor vehicles treated as the means for the transportation of goods are classed HE2 LAND TRANSPORTATION.

41 MUSEUMS

Museums are classified by type, such as art museums in N FINE ARTS, science museums in Q SCIENCE, and vintage automobile museums in TL MOTOR VEHICLES. Museums in general are classed in H SOCIAL SCIENCES.

42 MUSIC

When a work includes a page or two of music as an addition or supplement to the basic text, it is cataloged according to its primary subject, rather than under M MUSIC.

43 MUSIC DICTIONARIES AND ENCYCLOPEDIAS

General dictionaries and encyclopedias of music are classed ML LITERATURE OF MUSIC. Encyclopedias and dictionaries dealing only with a particular field of music are classed under that music form; i.e., an encyclopedia of rock music should be classed MG POPULAR MUSIC.

44 MUSIC HISTORY AND CRITICISM

The history and criticism of a particular kind of music, represented by the classification ME through MJ, is classed accordingly by type, rather than the more general ML LITERATURE OF MUSIC. For example, a history of theater music is classed MJ FILM AND THEATER MUSIC.

45 MYTHICAL ANIMALS AND MONSTERS

Material on these creatures is classed PR FOLK AND FAIRY TALES — GENERAL if inclined toward a literary approach, based on a legend without scientific data; QL ZOOLOGY when studied from a scientific point of view; and GN ANTHROPOLOGY when dealing with the beliefs of various peoples about the creatures.

46 NAVAL HISTORY

A book which combines naval history with other military history is classed U MILITARY SCIENCE. Naval history alone falls under the class V NAVAL SCIENCE. See also note 38.

47 POPULATION (OVERPOPULATION)

Works on population and overpopulation which deal primarily with their resultant economic effects are classed HB ECONOMICS. Material which concentrates on the biological effects (life cycle, food chain, etc.) is classed QH BIOLOGY.

48 PHYSICAL GEOGRAPHY

Materials dealing with the physical geography of one particular country are classed under the appropriate geographical area, rather than GB PHYSICAL GEOGRAPHY.

49 POETRY

In general, books of poetry are classed PP POETRY. The exception is when a book is a collection of poems which falls under one of the literature groups, such as PF GERMANIC LANGUAGES AND LITERATURE, other than English. For example, books of Japanese poetry are classed PL ORIENTAL LANGUAGES AND LITERATURE.

50 POLICE AND FIRE SERVICES

When police and fire services are discussed together in the same publication, the classification is HT COMMUNITIES. Books on these services individually are classed appropriately as HV CRIMINOLOGY or TH FIRE PREVENTION.

51 POLYGLOT PUBLICATIONS

Books in three or more languages should be classed according to subject and identified with a "POLYGLOT" stamp above the classification. For example, a general book introducing one to words and phrases in several different languages is classed POLYGLOT PZ LANGUAGE INSTRUCTION.

52 PUPPETS

Material on puppets in general is classed PQ6 PUPPETS AND PUPPET PLAYS; however, a book dealing solely with the construction of puppets is classed NP8 SPECIALIZED HANDICRAFTS.

53 RACE RELATIONS AND SEGREGATION

Materials dealing with race relations and segregation of one particular minority group in the U.S. are classed accordingly under the heading for that group. For example, a book on the segregation of Blacks in America would be classed EH3 BLACK AMERICANS.

54 RECREATIONAL VEHICLES

Recreational vehicles are classed with the particular recreation they represent, rather than TL MOTOR VEHICLES. For example, campers are classed SK OUTDOOR LIFE AND CAMPING; snowmobiles in XD WINTER SPORTS.

55 RELIGION

Material included under the classification BL RELIGION should be confined to that of a general nature, presenting comparative views. When a publication deals with the subject of angels, God, heaven, etc., solely from the point of view of one religion, it should be classed under that religion.

56 RELIGIOUS HOLIDAYS

Religious holidays, even those belonging to one specific religion, are classed GS HOLIDAYS AND FESTIVALS – GENERAL.

Alternate method: Religious holidays belonging to one specific religion, especially those outside Christianity, may be classed along with that religion. For example, a book on Rosh Hashana would then be classed BM JUDAISM.

57 ROCKETS

Material on rockets in general is classed TN ASTRONAUTICS. Materials dealing with military rockets are classed UF ARMS AND ARMAMENT.

58 SCIENCE EXPERIMENTS

Q2 SCIENCE EXPERIMENTS AND PROJECTS is reserved for general collections of experiments only. Experiments confined to a specific scientific field are classed under that field.

59 SENSES AND PERCEPTION

Material which treats the mental perception of those sensations brought about through the five senses is classed LB through LB7 CONCEPT FORMATION. Books dealing with the senses in a physical or scientific sense are classed QU HUMAN BODY.

60 SHIPWRECKS

Material on shipwrecks is classed VK NAVIGATION. When associated with seafaring life or stories of adventure, shipwrecks are classed G GEOGRAPHY.

61 SPEECHES

Speeches of an individual political figure are classed under the historical period into which they fall, rather than PN3 PUBLIC SPEAKING. For example, Lincoln's Gettysburg Address is classed EP UNITED STATES. CIVIL WAR (1861-1865).

62 STORYTELLING

Works treating the technique of storytelling, dealing with the "how to" aspect of the art, are classed PN3 PUBLIC SPEAKING. Collections of children's literature which may be used for storytelling are classed PN LITERATURE — GENERAL.

63 SINGING GAMES

Singing games in general are classed MC SONGS, or ME FOLK MUSIC when folk songs only are represented. Singing games which can also be considered street games are classed X SPORTS AND RECREATION.

64 TRUCKS

Books on trucks are classed TL MOTOR VEHICLES unless the approach concerns the transportation of goods via trucks. In that case, they are classed HE2 LAND TRANSPORTATION.

65 UNITED STATES TERRITORIES AND POSSESSIONS

Material covering a number of United States territories located in various geographical areas is classed EZ6 TERRITORIES AND POSSESSIONS. Individual territories and possessions are classed by their geographic location. For example, Guam is classed DU SOUTH PACIFIC — GENERAL; Puerto Rico, FL WEST INDIES.

66 VOCATIONAL GUIDANCE

When a book deals with vocational guidance in a certain subject area, it is classed under that subject. For instance, a book on jobs in architecture is classed NA ARCHITECTURE. Books dealing with vocational guidance in general, or covering jobs in two or more subject areas, are classed LC VOCATIONAL GUIDANCE.

67 WARS

Wars between nations are classed in their historical period, e.g., the Franco-Prussian War in D5 MODERN HISTORY (1800-1913). Wars involving the United States and one other country are classed in their historical period in the E class; thus, the Vietnamese Conflict is classed EV UNITED STATES (1946-). Wars involving only one country or geographical area are given the classification for that region; for example, the Arab-Israeli wars are classed DS2 NEAR AND MIDDLE EAST — GENERAL.

68 WATCHMAKING

Watchmaking appears as a heading under CE TIME MEASUREMENT because children's books tend to combine the concept of time with the practical aspects of clocks and watchmaking. Should a book deal with the industry of watchmaking alone, it would be classed TS MANUFACTURES AND TRADES.

69 WHEELS

Books on wheels treated as simple machines are classed QC PHYSICS. Material on the history of the wheel in regards to the development of transportation is classed HE TRANSPORTATION AND COMMUNICATION.

7

SOUND RECORDINGS

As with the adult subject book collection, the majority of the adult sound recordings collection is classified by the Library of Congress classification. The adult fiction book collection is arranged by author; the jazz and popular recordings collections are arranged by artist. Children's sound recordings (phonograph records and cassettes), as with the children's subject book collections, are classified by the adapted LC.

One of the major features of this classification system is its applicability to various media. As books and sound recordings, for example, are classified under the same system, materials can be more readily located. A child can therefore find a variety of materials on a subject under one classification.

MUSIC

A majority of children's sound recordings is classified in class M MUSIC. The following is a listing of the subclasses in class M and their application to sound recordings:

M INSTRUMENTAL AND VOCAL MUSIC includes all types of music except songs, folk music, popular music, and film and theater music.

MC SONGS refers particularly to young children's songs of no specific subject content.

ME FOLK MUSIC contains both traditional and national music.

MG POPULAR MUSIC applies to the more current and sophisticated music such as rock and soul or any future popular development, with special emphasis on the artists.

MJ FILM AND THEATER MUSIC includes sung and spoken materials from the movies, the theater, and television.

ML LITERATURE OF MUSIC is principally used to relate to a broad understanding of music and includes music history and development. It contains materials which stress concepts rather than instruction.

MT MUSICAL INSTRUCTION AND STUDY concerns musical instruments and instruction in how to play musical instruments. It also concerns aspects of music theory relating to music instruction.

Music index terms arranged alphabetically

This list also includes selected examples of the subclasses GS2 HOLIDAY COLLECTIONS and PS NURSERY RHYMES.

NOTES ON CLASSIFICATION

Recordings by subject. Since many children's recordings contain both spoken material and music, and since music may be used as an approach to the study of many subjects, recordings which emphasize a subject are classified according to the subject. Two major subclasses, GS2 HOLIDAY COLLECTIONS, and PS NURSERY RHYMES, are examples of subject areas which classifiers may expand to include songs and music. Other examples using specific recordings are Weather songs, which is classified QC2 METEOROLOGY, and Bill Cosby talks to kids about drugs, classified HY ADDICTION.

Fiction. In conformity with the children's book collection, fiction is not classified but is arranged by author. (An alternate method would be to classify fiction, according to the nationality of the author, in subclass PA through PN.)

Sounds by subject. Recordings of sound effects are classified by subject area. For example, sounds of farm animals would be SF ANIMAL CULTURE — GENERAL.

Biography and music. Biographies of composers are in CV INDIVIDUAL BIOGRAPHY. This refers to recordings whose primary content is biographical although they may contain selections of composers' works. (The music selections can be noted by additional headings in the catalog.)

History and appreciation of music. General materials on history and appreciation of music are classified in subclass ML LITERATURE OF MUSIC. Materials specifically relating to music history and appreciation in subclasses MC SONGS, ME FOLK MUSIC, MG POPULAR MUSIC, MJ FILM AND THEATER MUSIC and MT MUSICAL INSTRUCTION AND STUDY are placed in their respective subclasses.

Dance music. Dance music is determined by classification — folk dance music in ME FOLK MUSIC ballet music and dance music in M INSTRUMENTAL AND VOCAL MUSIC, rock dance music in MG POPULAR MUSIC. Materials on how to dance are found in XX DANCING.

Popular music. The main entry is the artist or artists in lieu of composer.

Foreign languages. All recordings not in English are placed in separate foreign language collections. This is a more suitable arrangement for a large foreign language collection. Materials are classified by subject with the addition of the name of the language noted above the classification on labels. A record in German on learning numbers, for example, would be GERMAN QA2 COUNTING or a record in Spanish on El Cid would be SPANISH PC ROMANCE LANGUAGES AND LITERATURE.

Materials on how to learn a foreign language are classified PZ FOREIGN LANGUAGE INSTRUCTION within the separate foreign language collection. An example of a specific recording is Songs to help you learn Spanish which is classified SPANISH PZ. Materials on learning English as a second language would be classified PZ within the normal subject collection.

NOTES ON CATALOGING AND PROCESSING

Notation. The first three letters of the composer's last name — or of the main entry — are placed under the classification. For example, the recording The Nutcracker Suite by Chaikovskii is M Cha, African village folktales by Edna Kaula is PR4 Kau, and Space songs (with title as main entry) is QB Spa. In the subclass CV INDIVIDUAL BIOGRAPHY, the last name of the biographee (the person being written about) is used. An example of a recording is Amos Fortune, free man by Elizabeth Yates, which is CV Fortune.

Catalog cards. Catalog cards for sound recordings are interfiled in the children's public card catalog. Card sets may include (1) composer or other main entry, (2) title, and (3) subject. "Record" or "Cassette" is stamped in the upper left corner above the notation.

Subject headings. The latest edition of Library of Congress Subject Headings is used.

SPINE LABELS AND SPECIAL COLLECTIONS

In this chapter suggestions and recommendations are made for spine labels and special collections based on policies followed by the Inglewood Public Library. This information has been included in order to present a more complete picture of a children's multi-media collection and will be of interest to technical services personnel and children's librarians.

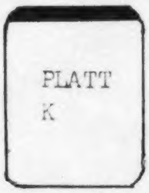
It is recommended that a special label be used on children's library materials. Recommended is a white pressure sensitive label (as with adult) with a red stripe on top so that children's materials can be easily distinguished from adult materials. This is especially important if the adult subject collection is classified by the Library of Congress system.

A suggested practice is to place the tops of labels two inches from the base of the book spine.

BOOKS

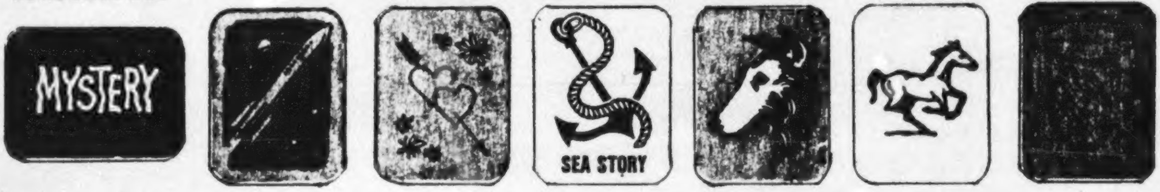
FICTION

It is recommended that the author's last name and first initial be indicated on the spine label.



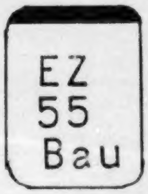
Platt, Kin
  The Boy who could make himself
disappear

Labels from library suppliers showing symbols for mysteries, science fiction, romances, sea stories, dog stories, horse stories, sports, etc. can also be considered.



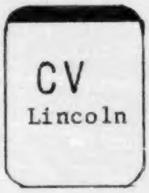
AUTHOR LETTERS USED WITH SUBJECTS

As indicated in the introduction, it is recommended that the first three letters of the author's last name (or main entry) be placed under the classification. Bulletin type (or orator type element for selectric typewriters) is recommended for spine labels for subject materials.



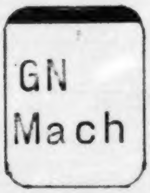
Bauer, Helen
California mission days

With biographies or autobiographies, the last name of the biographee is given in full. (Because of space limitations the name appears in regular type.)



Daugherty, James Henry
Abraham Lincoln

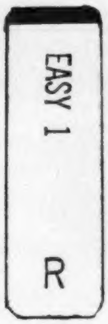
In the case of authors with last names beginning with Mc or Mac, four letters are used. (Mc is transcribed as Mac.)

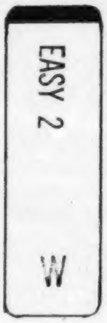


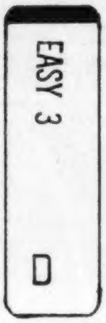
McHargue, Georgess
Mummies

EASY BOOKS

An easy book collection is recommended. This would cover pre-school through the third grade, including both books that the child can read and those which can be read to the child. For books with controlled vocabulary (readers), these could be divided into three groups — Easy 1, Easy 2, and Easy 3 — representing reading levels one to three. The spine label would include the first letter of the author's last name (as the reading level is considered more important than is careful separation by author).





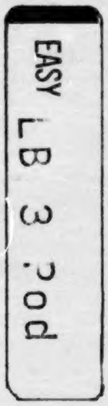


Rasmussen, Donald
Six ducks in a pond

Witty, Paul A
Star bright

DeLage, Ida
Weeny witch

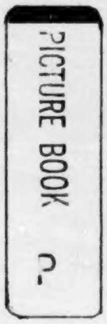
For easy subject books without a controlled vocabulary, it is recommended that labels indicate the word Easy, the classification symbol, and the first three letters of the author's last name (or main entry).



Podendorf, Illa
  Shapes: sides, curves, and corners

PICTURE BOOKS

Picture books, a category of easy fiction without a controlled vocabulary, could be considered in a separate collection. An author arrangement is recommended. "Picture book" should be stamped on the label with the first letter of the author's last name placed below (since picture books primarily form a browsing collection).

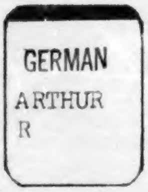


Potter, Beatrix
  Story of a fierce bad rabbit

FOREIGN LANGUAGE

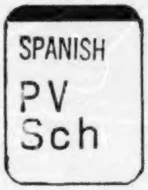
Materials in a foreign language may be classified in the same general manner as materials in English except that the name of the language would appear at the top of the label.

Fiction

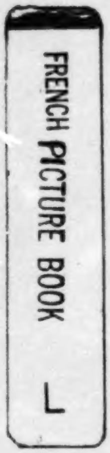


Arthur, Robert
  Die Drei??? und der
Fluch des Rubins

Subjects



Schulz, Charles M
  Snoopy, vuelva a
casa

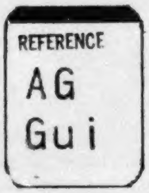


FRENCH PICTURE BOOK
L

Lionni, Leo
  Nageot

REFERENCE BOOKS

A stamp reading Reference can be used above the letters on the label to denote a reference book.



REFERENCE
AG
Gui

Guinness book of world records

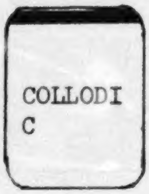
AUDIO-VISUAL MATERIALS

Labels (fiction and subject materials) for audio-visual materials are similar to those for books.

PHONOGRAPH RECORDS

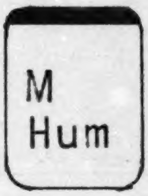
Labels for phonograph records are placed in the upper left corner of the album.

Fiction



Collodi, Carlo
  Pinocchio

Subjects



Humperdinck, Engelbert
  Hansel and Gretel

CASSETTES

These examples are based on cassettes housed in a locked viewing case with transparent plastic doors and front-only access. Because of the restricted view of the cassette, a more inclusive label is required to identify the contents. The identification label is placed on one of the short sides of each individual cassette box, almost covering the entire side. Cassettes can then be stacked while still allowing visual access to each label.

KIPLING How the leopard got his spots	Kipling, Rudyard How the leopard got his spots
PP Cia Ciardi John J. Plenty...	Ciardi, John John J. Plenty and Fidler Dan and you know who

KITS

Kits contain two or more multi-media materials — book, teacher's or user's guide, phonograph record or cassette, filmstrip. Kits are assembled in heavy plastic bags and hung on racks. The label which is placed in the upper left corner of the bag indicates the classification of the entire kit.

For security reasons, cassettes which are part of kits are given separate labels and locked in the cassette case.

Fiction	OLSEN E	Olsen, Einar Adrift on a raft
Subjects	CV King	Peck, Ira The Life and words of Martin Luther King, Jr.
